

Sunstone Campus Programs

Introducing

Job Oriented, Industry Led PG programs
integrated with **Sunstone PGP*elite***

Full time 2 Year AICTE/UGC approved PGDM/
MBA program offered from multiple locations

Director's Message

Dear Friends,

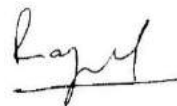

Let me first share with you my reasons of reaching out to you.

I have a unique profile that the last business I started ([GlobalLogic](#)) grew to over 10,000 people within 10 years. I saw a hyper growth business from the inside and learnt first hand about people like you and me the most.

All this while, I saw a constant fact around me as I interacted and reviewed thousands of job applicants and handheld successful professionals. I found that a true professional is created within a great campus. A sincere hand-holding experience in campus which hones skills and boosts confidence is what is required for a great first job and a greater successful career progression. Specially when it comes to a PG Management program, an industry oriented program where each student is allowed to excel, is the key.

I saw a great opportunity in re-imagining PGDM/MBA to meet today's needs. At Sunstone, we made it contemporary, industry oriented, more practical, even more fun! For your benefit, the product has been re-done ground up. It is common in other industries - 2G gave way to 3G, which is now giving way to 4G. These are not incremental improvements, they are complete re-designs. This is the real potential in a campus program that can be yours now.

We started on this path three years back with our path breaking, problem based learning design for experienced professionals. We saw amazing results. We are now bringing this benefit to students through our campus PG Management programs. We have partnered with colleges to offer you a real professional solution – we take **complete responsibility** of the students from admissions to placement. This is the future we are working towards. Are you with us?

Rajul Garg,
Director

We take
**complete
responsibility**
of the
students from
**admissions to
placement.**
This is the
future.

Taking PG Management Seekers to Industry...

“Having created large businesses from scratch myself, I have become a strong believer in human talent and the power of training. I undertake to make every student I come across, a real professional confident about his career progression in the corporate.”

Rajul Garg
Director

What is Sunstone?

Sunstone is a management education entity directly emanating from the corporate domain with the idea of **“Designed by Industry, For the Industry”**.

Sunstone Business School was formed in 2010 and successfully running its business program for working professionals since then. Sunstone is built over 4 primary pillars:

1. PG Management Education should be designed for the student seeking a career

Management graduates should be prepared to be instantaneously eligible for a good start in their careers. Hence, education has to be very closely integrated with the industry requirements. Every part of Sunstone has the stamp of the corporate world. Right from the founders, faculty, the course curriculum, the live projects, internships, pedagogy, activities and finally placements.

2. Curriculum should be Job-oriented not Theory-based

Management professionals are required to solve real business problems and work in intense business situations. Hence, the curriculum should be closer to real situations rather than covering theoretical aspects only. All courses at Sunstone are mandated to have real business problems and all theoretical aspects are followed by real business use cases.

3. Faculty from Industry should act like a career mentor

Purpose of faculty is more than broadcasting the lectures- it should include coaching students for real corporate experiences. We believe that students only learn when they work with coaches to practice management concepts in realistic situations.

4. Use of technology to create new age managers

Technology has reduced the information gap and students have access to the best possible content in the world. Sunstone leverages this content to make sure the students are aware of global phenomenon in management. Technology understanding is also a requirement to be a informed manager in current information age.

- ✓ **Designed for industry**
- ✓ **Customised management teaching pedagogy - UPLIFT**
- ✓ **Faculty from Industry**
- ✓ **Technology for global managers**

Having established itself in the online PGPM, Sunstone Business School is now operating multiple campuses pan India running full time AICTE/UGC approved PGDM/MBA programs. Besides developing curriculum for the main program, Sunstone has developed a unique certificate course *PGPelite* which is integrated into the main curriculum. This industry designed course focuses on building knowledge and skills for entry level management corporate positions.

Sunstone Difference

Story of Sunstone

The backbone of any educational enterprise is its faculty. The founder of Sunstone is Mr. Rajul Garg, a corporate entrepreneur and achiever. After his engineering graduation from IIT Delhi, he co-founded GlobalLogic and later delved into many more corporate ventures in technology, healthcare and education. He realized it is time to give back by enabling more and more young people **Achieve Job-Winning-Ability and Learning-Attitude (JWALA)** at college itself. He is the main force behind the curriculum development which comes not only from his vast corporate knowledge and interface but also with the support of a large team of Sunstone faculty who have successful corporate backgrounds.

The co-founder of Sunstone is Mr. Dinesh Singh who is also an engineer from IIT and an MBA from Cornell USA, who worked with best consulting companies such as McKinsey & Co and has diverse experience in education, telecom, healthcare, retail.

Mr. Nituj Gupta, the Executive Director of the Campus Programs is an honours mechanical engineering graduate from NIT Rourkela with several post graduation qualifications in management, sales and marketing, materials management & ecology and environment management. He has an illustrious corporate background spanning public, private, MNC with international experience

Sunstone in the context of evolution of PGDM/MBA

An important thing to understand is the evolution of management education in India. The IIMs have been the leaders in this space and as the demand for management education grew several institutions mushroomed all over the country. Most of the colleges lacked the most important corporate interface which was required to ensure the end result of a commensurate placement for their students. The result was that the students slowly got more skeptical and the demand for the program started waning. **Does that imply that the management program has lost its relevance? It is actually the other way around. The human capital has become even more important to any successful corporate enterprise. Management education in the same continuation is still an indispensable part therefore with most domains still needing management professionals.**

Founders teach students face to face at campus

Each student personally mentored

Handling corporate interface & placements

A portrait of Dinesh Singh, a man with dark hair, wearing a dark suit jacket, a light blue shirt, and a dark blue tie. He is smiling and looking directly at the camera. The background is a blurred outdoor setting with buildings.

“Management education needs to be practicable and applicable in real world scenarios. Sunstone is restructuring the management education to build new age managers who can instantaneously add value in corporate world”

Dinesh Singh
Director, Student Experience

What is Sunstone PGPelite?

Sunstone Business School PGPelite program is started in multiple campuses in Delhi NCR region by integrating in existing PGDM/MBA programs. Sunstone campuses offer a dual program including AICTE approved PGDM/MBA with an integrated Sunstone PGPelite to successful students.

Sunstone has christened its own program as PGPelite. While PGP implies Post Graduate Program meaning simply that the base qualification for taking admission is graduation in any stream, the subsequent word 'elite' is a well thought one with a deeper meaning to exhibit the focus and difference that Sunstone intends to create in each of its students.

This word in itself defines that each of the students who are part of the Sunstone PGPelite program on successful completion would be known by the industry as a select group of management professionals that is superior in terms of ability or qualities in handling managerial functions.

To ensure that this does not stay simply a philosophy but provides a specific and defined path of action right through the pedagogy, the word has been further defined internally. At sunstone therefore, elite also stands for an acronym defining the abilities or qualities in a management professional that would make our students a select group superior to others in the eyes of the corporate world.

Features:

- ✓ AICTE approved PGDM integrated with Sunstone PGPelite certificate
- ✓ Intense industry integrated curriculum with integrated internships in 2 year management program
- ✓ Flexibility in choosing campus as it is offered in multiple locations
- ✓ Learn with the best in the industry to stand out in corporate community

The word "elite" according to the English dictionary means ***"a select group that is superior in terms of ability or qualities to the rest of a group or society"***

Sunstone PGPelite therefore is that differentiator which the industry recognizes.

E-L-I-T-E

E – enthusiastic. Sunstone campus program is for young graduates who may or may not have active work experience. The corporate entities therefore expect them to be energetic and “go-getters” who are willing to learn and quick to implement. This will be inculcated in the students in a defined structural manner ensuring that students participate actively in all case studies and situations discussed and find various alternate solutions which they also apply and test through live projects

L – learned. Theory and practice are deeply interrelated. Theory is a documentation of practice and as new things are practiced the theory keeps getting evolved. Management education is less of a science and more of a sharpening of the mind to analyze situations quickly, and come to solutions which largely give positive solutions within the defined timeframe. The importance therefore is to teach the basic concepts in a manner that students imbibe them and use them as a filter to understand various situations and activities happening around them. They have to learn to develop a learning mind which is ever learning.

I – innovative. Innovation is the hallmark of any management professional. Doing the same thing in the same manner, however number of times will always give the same result. Therefore the theory is to be understood and imbibed so as to be able to develop a means which is different and which has the potential of delivering an even better result. That is the only mantra of growth in this competitive corporate world. Sunstone has a pedagogy which focuses on research and doing. The time spent during the program is to ensure that students get used to thinking up new ideas and methodologies, research them well and practically experiment.

T - trustworthy. “Trustworthy” encompasses a lot of tenets. Honesty is one part of it and it needs to be defined by every individual for himself/herself. For the corporate world, a professional who is true to profession is trustworthy. Hence, when in doubt, it is the profession and organization which comes first and not any individual. For young graduates, other tenets which are encompassed here are punctuality, delivering on deadlines or providing timely feedback without the need of any follow up.

E – enterprising. Once all the above traits are covered, what is that one special factor which a corporate body would always look at. The answer lies in this final word- Enterprising. There is always an inherent risk and uncertainty attached with business and ability defining someone who can do business well is “enterprising”. A management professional needs to think like an entrepreneur and take decisions. Not only take the decision, but to also take the responsibility of the same and be accountable for the outcome. Only with responsibility comes authority which manifests in the most important positions and corporate profiles that a student pursuing management education aspires for.

PGPelite's Corporate Connect

Industry Integration

- Sunstone is managed by experienced industry professionals directly as well as indirectly.
- Industry advisory and curriculum steering committees include top CEOs and professionals. Faculty also holds advisory positions and connects in industry.
- Linkages with various industries across product categories and domains helping in students get several placement and internships opportunities in the specialization they choose.

Placements

- Internship programs aiding in getting pre-placement offers when the students are still to complete their course.
- A large conglomerate SPICE group backs the venture and itself has several vacancies for fresh management professionals every year across specializations.
- Multiple office locations at key corporate hubs of the country including Bangalore and Pune will further aid in getting more and wider placement opportunities.

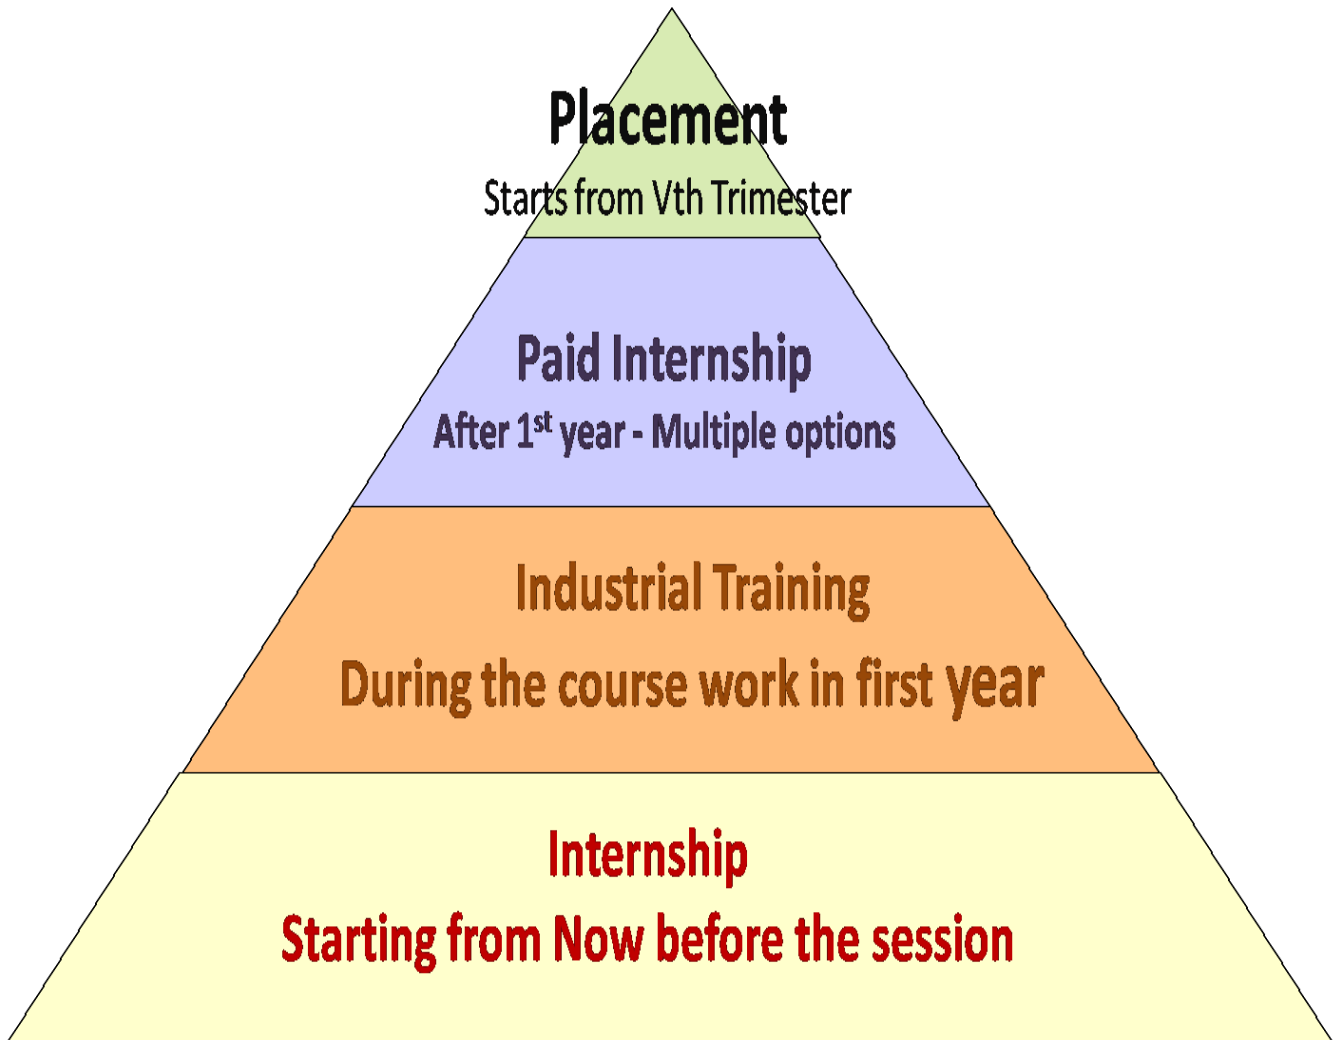

Incubation Programs

- Several start ups with first time young entrepreneurs are helped and encouraged by our faculty. These startups are also allowed to function out of our campuses. This provides live examples and insights to our own students.
- Entrepreneurship development being an important part of the development of the country's economy and also sought after much more actively now by the young generation, Sunstone provides a unique opportunity to follow these aspirations at sunstone campuses.

Internship Programs

- Internship programs are an inherent and compulsory part of the PGDM programs integrated with the Sunstone PGPelite program.
- Internships have also been organized at various organizations in healthcare, banking, telecom, technology, and several others for students who can do this prior to joining the course. This shall give valuable initial corporate exposure which will help better learning and understanding of the management concepts taught.

Sunstone Promise: Each Student Grows

Before asking you to commit, we commit ourselves to you.

Growing as a management graduate will require you to be connected with industry at all steps. Sunstone has already created over 400 internships for students so they can get real industry experience even before they start their PG program.

Our Promise: Let Each One of You Bloom

Sunstone's Unique Offering- Techie 50

Specialization in Analytics & Finance for 50 students

The Next Big Thing: Gain the expertise most important to you

- ✓ Harvard Business Review says the Data Scientist is the 'Job of the 21st Century'.
- ✓ NASSCOM projects 5X demand for Analytics professionals in India at 2,50,000.
- ✓ It is among the most well paid jobs; plus it is also among the most well-paid first-jobs.

Analytics at Sunstone

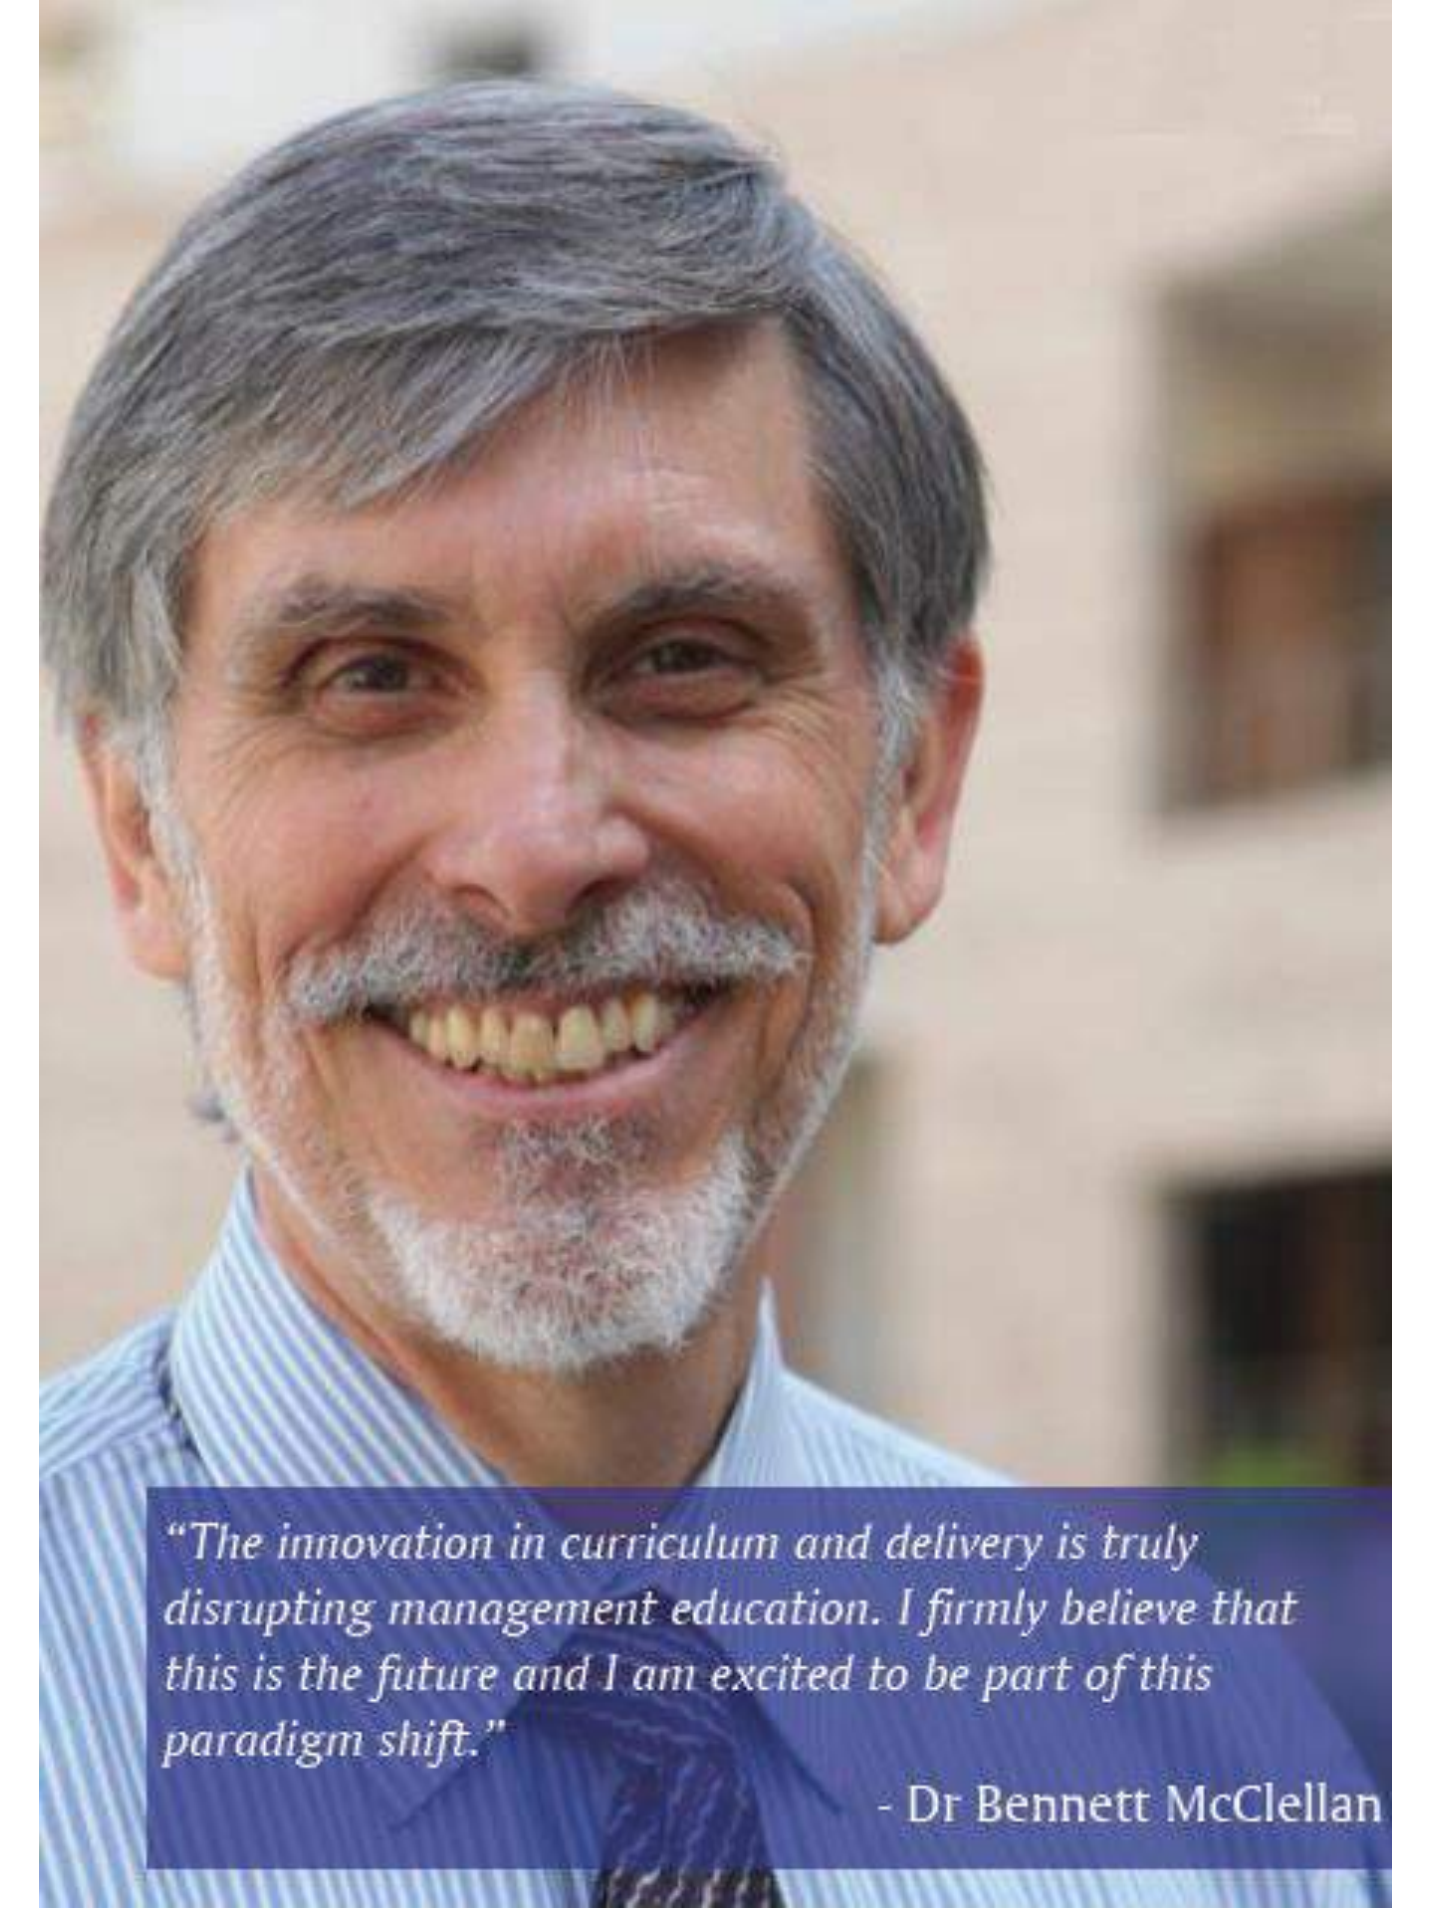

- Foundation of Analytics
- Statistical Inference
- Applications of Analytics in Business Function
- Advanced Business Forecasting
- Advanced Analytics
- Application of Analytics in Business Verticals

Analytics & Big Data at a glance

- Around 7 billion shares are traded every day on the US stock markets.
- Walmart collects 2.5 petabytes of data from customer transactions every hour.
- 10,000 credit card transactions are made every second.

- ✓ Sunstone guarantees placement to all 50 students under this program.
- ✓ Placement guarantee for a job of at least INR 3.6 lacs per annum.
- ✓ Post-dated cheques to each of the 50 students equivalent to salary.

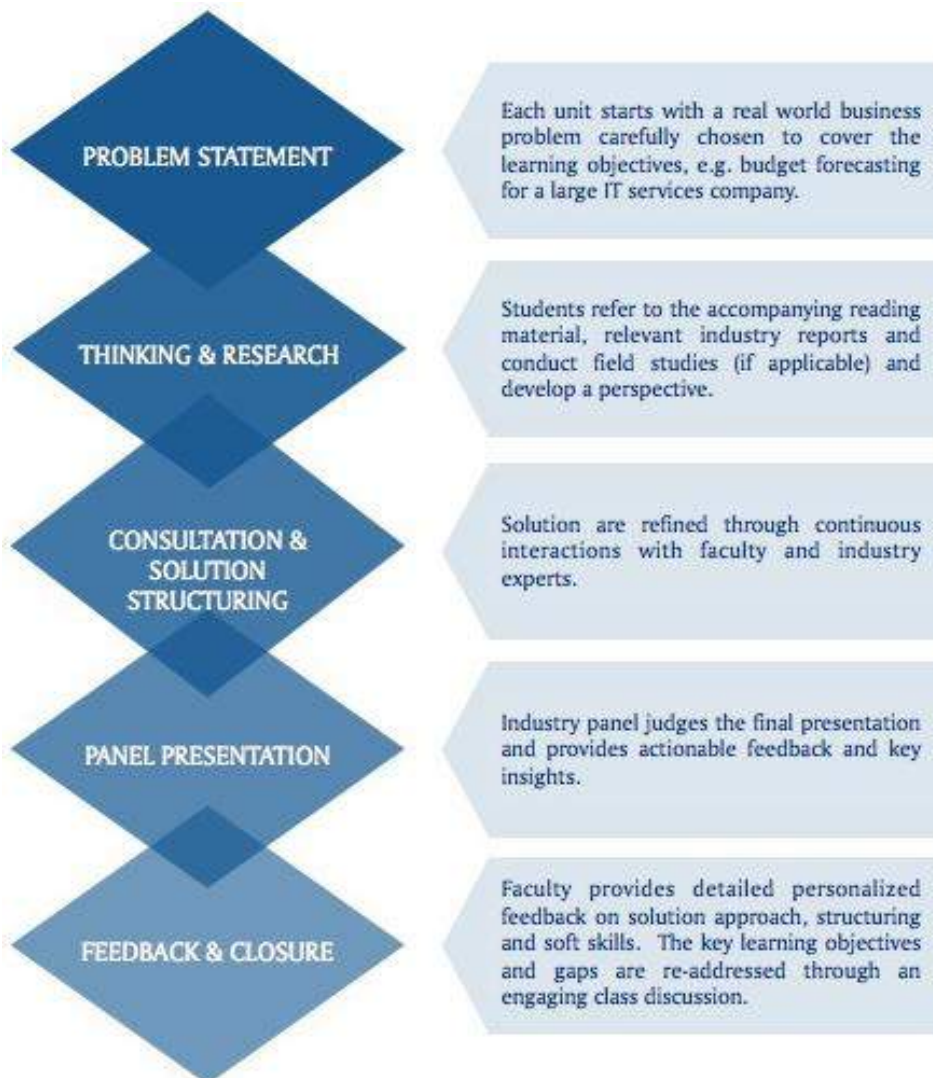

A close-up portrait of Dr. Bennett McClellan, a middle-aged man with grey hair and a goatee, smiling warmly. He is wearing a blue and white striped shirt. The background is a blurred outdoor setting with a building.

“The innovation in curriculum and delivery is truly disrupting management education. I firmly believe that this is the future and I am excited to be part of this paradigm shift.”

- Dr Bennett McClellan

Sunstone Pedagogy - UPLIFT

The basis of Sunstone program is learning experientially, similar to the way we learn at work. There are two ways in which we make this happen – firstly, by following a problem based learning pedagogy and secondly, by following a strong peer collaboration approach to learning. This unique pioneering and successful pedagogy of problem based learning has been graphically represented below. UPLIFT is further a customization to suit the student entering the campus programs.

PG*Pelite* is interwoven with regular PGDM program to make students corporate ready. The program is integrated with regular industry internships at different intervals including before joining the program, after finishing 1st year of program and final semester of the program.

Sunstone Pedagogy - UPLIFT

Sunstone Business School has successfully pioneered the online PGPM course for working candidates with the “Problem Based Learning” pedagogy. Taking this forward and customizing the same for the regular full time classroom based PGDM/MBA programs, Sunstone Business School has come out with the UPLIFT pedagogy.

U – understand. Classroom Teaching as practiced mostly in regular courses with the objective to make students aware of the basic concepts.

P – practice. Theory and practice are deeply interrelated where theory is a documentation of practice and as new things are practiced the theory keeps getting evolved. Understanding is enhanced by practical examples related to the actual usage in the industry.

L – learn. This is the stage where the established problem based learning approach which is the hallmark of the teaching methodology at Sunstone is applied. The previous page has a detailed graphical representation explaining this part of the pedagogy.

I – imbibe. To ensure that any learning becomes a permanent part of the way a student thinks it has to be imbibed and internalized. That means that the student needs to do individual activities and go through evaluation methodologies which ensures that the student internalizes the learning and the same is reflected in the evaluation.

F - future. Students need to be further mentored and tutored to think and innovate beyond the current way of doing things to how things could be shaped in the future. That is the way the industry grows and a competent manager not only has to be deeply involved but has to be the driver of this change.

T – technology. Technology has reduced the information gap and students have access to the best possible content in the world. Sunstone leverages this content to make sure the students are aware of global phenomenon in management. Technology understanding is also a requirement to be an informed manager in current information age.

Management Team

Rajul Garg

(Director)

- Rajul co-founded GlobalLogic, sold for \$420M in 2013 to Apax partners in the largest deal of the year in India.

- Rajul is an entrepreneur, angel investor and board member for several companies. He provides mentorship to multiple start-ups in India.
- Rajul is a graduate from IIT Delhi.

Dilip Modi

(Chairman, Executive Board)

- Dilip Modi is the Executive Vice-Chairman, Spice. Spice Group is US \$2 Billion conglomerate.

- Spice has interests primarily in Mobile Devices, Mobile Retail, Mobile VAS. Spice also runs Spice Hotspot, the leader in mobile retail, and Saholic, an e-commerce company.

Dinesh Singh

(Director, Student Experience)

- Dinesh has diverse experience in business consulting, business development, sales & marketing.

- He worked with world's top consulting company McKinsey in US and consulted Fortune 500 companies.
- Dinesh is an engineer from IIT Kanpur and an MBA from Cornell USA

Nituj is B.E. (Hons.) in the Mechanical stream from NIT Rourkela and holds various PG certifications in Quality Management, six sigma and others

Devendra Mangani

Devendra has extensive experience in Finance and Operations. He worked in global strategy team at RBC capital markets in Canada, as well as in manufacturing companies

Devendra is a graduate from IIT Bombay and holds an MBA, Strategy and Finance from Queen's School of Business, Canada.

David Wittenberg

David's areas of professional interest are innovation, strategy, marketing and management. David takes classes and delivers short programs to students at some

David is MBA (Honours) at Thunderbird School of Management and has also launched University 4.0 to transform higher education in India

Tapan Rayaguru

Tapan has led large teams (2,000 people+) in his career and he is an Analytics, Business Development and Account Management expert with international exposure

Tapan is an alumnus of IIT Kharagpur and IIM Calcutta, and has an experience of over 20 years in the IT and Analytics industry

Faculty

Joseph A. Hopper

- MBA from ISB in Finance & Entrepreneurship, B.A. from King College in International Business
- 10+ years experience in education delivery

Saurabh Agarwal

- Graduate from Delhi School of Economics and MBA from INSEAD, France
- Strategy consulting experience with McKinsey, AT Kearney

Megha Khatri

- BTech from IIT Delhi and MBA from ISB, Hyderabad
- Experience in Analytics, Consulting in different sectors

Mrityunjay Kumar

- Graduate from IIT Delhi, Exec-MBA from Foster School of Business, Washington
- Experience in Technology Products and Marketing

Sandeep Gupta

- BTech from NIT Jaipur, MBA from Thunderbird School
- Operations and supply chain experience with companies such as Phelps Dodge, Electrotherm.

Gaganpreet Luthra

- Masters from IIT Delhi
- Experience in Technology Management, digital marketing and sales in IT services and e-learning industries

Medha Sharma

- MBA from Symbiosis
- Experience in leading large teams, operations, and processing in Finance industry with global banks

Nitin Batra

- BTech, IIT Kanpur and MBA from INSEAD, France
- Innovation and Brand Management expert with FMCG and consulting experience

Surender Gaur

- Sunstone, Dublin Business School
- Experience is software operations and management with companies such as Dell Services

Dr. Pankaj Gupta

- Engineering graduate and MBA
- Vast industrial and academic experience, trainer in behavioural science and part of Inmantec for 15 years.

Dr. Kamal Gupta

- PhD in Marketing, PGDBA, BBA
- Extensive teaching and research experience with various research publications in Service Marketing, Brand management

Dr. Rajeshwar Nath

- PhD and Masters in Economics
- Published two books on his interest areas- application of economics, quantitative methodology

Admission Process

Eligibility

A graduation in any discipline is accepted for admission to a post graduate management program. All candidates are required to take one of the exams – CAT or CMAT or MAT or XAT. Otherwise, the candidate should appear for a written exam conducted by Sunstone Business School.

* For specialization in Analytics and Finance (Techie 50), BTech/BE degree is a requirement.

Process Steps:

Step 1: Fill enquiry form: <http://sunstone.in/campus/enquiry-form/>

Step 2: Sunstone team would interact with you and will also help you set up an appointment with a faculty mentor with corporate background. The interaction thereafter will help the student understand Sunstone and vice versa allow Sunstone to understand the student, his/her aspiration with respect to the course and the potential exhibited to imbibe the necessary knowledge and skills at sunstone within the defined timeframe.

Step 3: Fill the admission application form at the website- <http://sunstone.in/campus/admission-application-form>. Admissions team will send a Short corporate case/article.

Step 4: In-person interview with Sunstone admissions team.

Step 5: If selected, receive registration form for the program and deposit the registration fee

Step 6: Receive an acceptance confirmation from Sunstone.

It is further suggested that this process be initiated at the earliest because Sunstone aims to provide corporate internship programs to students who register early so that the much needed understanding of the corporate world comes at an initial stage which would act as a catalyst for better learning.

- ✓ All students are eligible for an internship before start of the regular session.
- ✓ Internship are available now. Admitted students are already doing it.
- ✓ Students will have option to 1-on-1 counselling from an industry expert before admission interviews .
- ✓ For Techie 50, specialization in Analytics & Finance, BTech/ BE degree is a requirement

Admissions: 1-on-1 counselling

Opportunity to talk to Sunstone Counsellors

Sunstone provides a unique opportunity to help students understand more about their fitment in Sunstone management program and it's relevance. Students can take advantage of this session to know about MBA education, Sunstone program, career prospective and curriculum delivery.

Process for setting up counselling session:

1. Fill up the enquiry form at website (<http://sunstone.in/campus/enquiry-form/>) and provide your details in the form
2. Our team will call you at the given contact number and send you an e-mail at given e-mail id to set up your session. This can be in-person or on phone
3. Counsellor will call you on your phone or meet you in-person as planned. This session would be for 30-45 mins and counsellors will answer all your question and provide relevant details

This counselling session is your chance to know Sunstone and talk to management/faculty involved in the program.

Sunstone Counsellors

Dinesh Singh

IIT, Cornell Alumnus
Experience in Sales & Marketing, Operations, General Management

Tapan Rayaguru

IIT Kgp, IIM Alumnus
Experience in General Management, Sales, Business Development, technology and analytics

Nituj Gupta

NIT Rourkela Alumnus
Experience in Sales & Marketing, Operations, General Management

Gaganpreet Luthra

IIT Delhi Alumnus
Experience in Technology, Marketing, General Management and education
