MODEL QUESTION PAPER

Duration: 3 hours

Maximum Marks: 80

Total No. of Questions:60

SECTION A

Read the following passage carefully and answer the questions given below:

Kisa Gotami had an only son, and he died. In her grief she carried the dead child to all her neighbours, asking them for medicine and the people said, "She has lost her senses. The boy is dead."

At length, Kisa Gotami met a man who replied to her request, "I cannot give thee medicine for thy child, but I know a physician who can,"

And the girl said, "Pray tell me, sir; who is it?" And the man replied, "Go to Salyamuni, the Buddha."

Kisa Gotami repaired to the Buddha and cried, "Lord and Master, give me the medicine that will cure my boy."

The Buddha answered, "I want a handful of mustard-seed."

And when the girl in her joy promised to procure it, the Buddha added, "The mustard-seed must be taken from a house where no one has a child, husband, parent or friend."

Poor Kisa Gotami now went from house to house, and the people pitied her and said, "Here is mustard-seed; take it!" But when she asked, "Did a son or daughter, a father or mother, die in your family?" they answered her, "Alas the living are few, but the dead are many."

Read the following poem and answer the questions set below it.

Stopping by Woods on a Snowy Evening

Whose woods these are I think I know.
His house is in the village, though;
He will not see me stopping here
To watch his woods fill up with snow.

My little horse must think it queer
To stop without a farmhouse near
Between the woods and frozen lake
The darkest evening of the year.

He gives his harness bells a shake
 To ask if there is some mistake.
 The only other sound's the sweep
 Of easy wind and downy flake.

The woods are lovely, dark and deep,
 But I have promises to keep,
 And miles to go before I sleep,
 And miles to go before I sleep.

Robert Frost

6 Name the figure of speech underlined in the poem. 1

Answer in one sentence each of the following.

7 Where did the poet make his horse stop? 1

Bones are a vital part of our body. They give a structural framework to our body. Bone tissue acts as a mineral reservoir and helps in maintaining the calcium balance in the blood. Human bones have three phases in life. There is a growth phase during which about ninety percent of the bone mass is deposited.

Consolidation of the bones takes place up to the mid-thirties during which period there may be a slight increase in the bone mass. The involution starts after forty to forty-five years when bones start becoming thinner.

The most common thinning of bones is called osteoporosis. The risk factors for early osteoporosis are heavy smoking, high alcohol intake, inactivity and low calcium intake. Osteomalacia is another condition found in elderly people. The main cause here is deficiency of Vitamin D as outdoor activities diminish with advancing age.
